# Great *Traveller* products from

BITS has a product for every Traveller referee and player, whether you want to flesh out a world's **Government**, its **Religions** or its indigenous **Lifeforms**, perhaps find somewhere for your players to **Rendezvous**, or see which **Cargos** and **Travellers** might be wanting to take passage on their ship?

Now you've got some worlds to explore, you need to populate them with **Patrons** and **Plots**, and perhaps some fully-detailed adventures, from noble intrigue (*Khidkar Incident*) to Vargr mercenaries (*Spacedogs*) or Zhodani infiltrators (*Delta 3 Is Down*). All that excitement might well end up in gun fights which you can play out using *At Close Quarters*.

Try out our *Traveller* starship combat game **Power Projection** using award-winning game mechanics from *Full Thrust*.

Or do some background research using our extensive bibliographies of *Traveller* books and magazine articles.
